## OBJECTIVE

---

To join a dynamic, fast-paced team and utilize my wide range of technical/creative skills and diverse background to develop innovative interactive solutions.

I have 11 years experience as an internet applications programmer, building websites that facilitate information exchange, provide security and promote e-commerce, coded to W3C validation standards and guidelines. I also create graphics and illustrations for print and internet and design website interfaces to streamline the user's experience and meet the needs of each visitor. I am resourceful and organized with a flair for problem solving and communication.

## WORK HISTORY

---

### **City of Fairfield, OH [Aug. 2007 - present]**

Programmer of multiple web applications built on Windows and ColdFusion platforms with Oracle and Microsoft SQL Server backends, expanding digital government services to citizens, businesses and city staff:

- Designed and executed DTS packages to automate data-exchange between SQL Servers
- Utilized web technology to improve citizen satisfaction (delivery of public services)
- Expanded online payment transaction processes and Developed new e-Gov functionality for Citizen Request Management
- Evaluated and implemented Content Management System (CMS)
- Added Crystal Report functionality and enhanced administrative web tools
- Enhanced city intranet with database-driven applications
- Replaced multiple limited-functionality databases with Oracle Enterprise system
- Created emergency disaster recovery website

### **Contract/Freelance Developer and Designer [1997 – present]**

#### **Ec link, Cincinnati, OH [2004 – 2007]**

Continued developmental efforts of eGovLink, <http://www.egovlink.com>, an on-line resource for governments to organize documents, collect payments, display community events, etc., and coordinate with governments' public websites using CSS.

Configured content management templates (Savvy Software), created custom code modules and setup databases.

Designed city and township websites including: [City of Silverton](#), [City of Loveland](#), [City of Pikeville](#), [City of Vandalia](#), [City of Niagara Falls](#), [Village of Lincolnwood](#), [Colerain Township](#), [Miami Township](#).

### **Upright Communications, Cincinnati, OH [1998 – 2007]**

Developed web modules for client web sites including: administrative functions, calendar of events, user login, e-commerce, comma delimited files from web forms and customer security in IIS and Apache server environments.

Designed and coded web sites to W3C validation standards and guidelines with an emphasis on CSS.

Inserted content and meta data for search engine optimization.

Sites included [Verdin Bells](#), [HCDC](#), [Cincinnati Fan](#), [Good Samaritan Hospital](#), [Middletown Hospital](#), and [Nexergy](#).

### **The Children's Theatre Of Mason, Cincinnati, OH [2003 – present]**

Designed corporate branding, logo and website.

Created email campaign and web-based theatre management tools. [www.childrenstheatreofmason.com](http://www.childrenstheatreofmason.com)

### **Additional clients**

[South Western District Church of the Nazarene](#), [His Kids Learning Center](#), [Kids 4 Cure](#), [GiftBats](#), [BWF-America](#), [JG-Designs](#), [Main Street Studios of Dance](#), [Higher Ground Conference Center](#), [The Studio of Dance](#), [Lazer Kraze](#), [Real Milk Paint](#), [Belmont Catering](#), [Install Solutions Inc.](#), [Deerfield Methodist Church](#) and [CINTAS](#)

### **Ohio River Co, Cincinnati, OH / Ingram Barge Co, Nashville, TN [Aug. 2000 – Aug. 2005]**

Web developer of internal and external applications utilizing ASP programming with SQL Server and mainframe backends:

- Redesigned relational data sources and GUI of client barge tracking systems and provided the user with data choices of mapping (DHTML) or text/reporting (CSV) formats. <http://www.ingramtowline.com>
- Built administrative control module for easy modification of customer profiles.
- Provided technical support and design for a newly developed web application to facilitate information exchange of barge loadings/unloadings.
- Added ETA and position functionality to public website.

Acted as technical project lead for a new User Access and Security module simplifying application login maintenance.

### **CTD Technologies, West Chester, OH [Sept. 1999 - Sept. 2000]**

Created feature-rich ASP applications featuring:

- Secure shopping
- Affiliate program compatibility
- Client ability to edit content and navigation
- Bookkeeping reports to track productivity
- Quick and advanced search routines
- Realtor/buyer appointment and contact component
- Banner rotation module
- Custom logos and user interfaces
- On-line surveys
- Secure join forms and messaging systems
- On-line training video game

Customer samples: [LBDtogo](#), [Jewish Family Service](#), [Friedman-Swift](#)
